Application Recommendations

GENERAL CONDITIONS

- All paint to be used on the Surepaint™ projects must correspond with the Surepaint's paint specification.
- Surfaces must be free of any contaminants prior to painting.
- All surfaces must be clean, bare, dry and free of wax, grease and other contaminants. The presence of contaminants can result in insufficient bonding of the coating and can cause product failure.
- Removal of all dust is essential for a successful job. Sweep away all dust and debris.

COLOUR

- Paint must be supplied to site pre-tinted as per the Surepaint™ Colour Selection Document, that has been supplied by Surepaint™
- Always check the colour before application as Taubmans will not take any responsibility after the paint has been applied
- **No onsite tinting is allowed**
- When painting darker colours, you may require the correct tinted undercoat to ensure maximum coverage
